[text] **Forex Brokers News Source:** Just Forex Broker (Review and Forex Cashback) From now on the browser-based version of our trading terminal – **JustForex Webtrader** is available to you. Webtrader is now in the testing mode and is available only on demo-accounts, but in the nearest future you will be able to use it while trading on real accounts. At the moment we continue working on improving the terminal and soon it will be provided in a new user-friendly design, new indicators and some other improvements will be also added to Webtrader. The main advantages of Webtrader terminal: - **no** necessity to **setup** it on your device; - easy and **comfortable** interface; - opportunity to use it **anytime** and **anywhere**; - opportunity to use it on **any devices** even on those which do not support Flash technology. This terminal is a perfect choice for newbies who make their first steps on Forex because of its rather simple functional which is available in English, Indonesian, Malay and Russian. **Latest Forex Brokers News By PipSafe.com** [/text]
