

Forex bonuses and promotions (No deposit bonus in Forex & in Binary Options)

I think that No deposit bonus in Forex Trading or in Binary Options has more advantages and less disadvantages..i am trading with Forex trading mostly, so i would like to talk about No deposit Bonus in Forex. **Advantages of No Deposit Bonus (You can Start Trading Forex for Free!)** When you get No Deposit Bonus in Forex trading, then it provides you an opportunity to [learn Forex trading](#) well without any investment and risk...you can apply your knowledge, skills, and strategy on that no deposit bonus..so even if you are unable to make any profit, still you will be able to sort out mistakes in your Trading without any losses...More, if you are unable to invest your own money, then-No Deposit bonus is the best for you to start Forex trading and earn some real money without own money. Thirdly, there are [a lot of brokers](#) in Forex trading market, so you never know that whether they are reliable or not..so No deposit Bonus will not only give you an idea that whether they are reliable or not, but it will also help you in knowing their different rules..More, you can also know that which broker has a fast execution of tradings, withdrawal process and other things by Trying their No Deposit Bonus..so its has more advantages rather than disadvantages.

Disadvantages for No deposit bonus (Disadvantages of Forex Bonus)

When you try No deposit bonus in [Forex](#) trading, then you will always

get use to free money, so you will always have a fear to invest your own money and cannot trade freely. secondly. when you trade on no deposit bonus, then will always take more risk , because you will feel that its free money..so you cannot apply your own knowledge and skills effectively... Same is the case with binary options.. so i can conclude that No deposit bonus in both [Forex trading](#) and Binary options has a lot of advantages, especially for newbies who wants to [learn about Forex trading](#) or [binary options](#). **By Hidayat Ur rehman**
