

MT4 WebTrader and Orbex Broker Limassol, October 6, 2016 - [Orbex](#), a recognized leader in online trading and innovative financial services, has today announced the launch of the MT4 WebTrader, a cutting-edge cloud-based application that provides always-on, instant, and secure access to the MetaTrader 4 account from anywhere, anytime. The extension of Orbex trading platforms' range addresses the growing demand for online investment solutions and enables traders to focus on the issues that require their substantive expertise: strategy and financial decisions, while Orbex solves the technological challenges. Equipped with a scope of essential features, WebTrader maintains full desktop functionality with various indicators and is spared from redundant functions to keep the application lightning-fast and stable. The preference revolves around comfort and ease of use from trader's perspective, allowing users to access their account, trade and view history, using any online browser on any device. *"The elaborated approach to product development and maximum effort in enhancing user experience underline Orbex long-term commitment to creating a reliable and efficient investment environment,"* said Zaid Alkhatib, COO at Orbex. *"We concentrate on the flexibility of our services and utilize every opportunity to offer our clients a dedicated support."* **[About Orbex \(Orbex Forex Broker Orbex Review\)](#)**
