

**Strategies to achieve a profit in the Forex** Achieve [a profit in the Forex market](#) is the main objective of traders to undergo Forex

investment business. But sometimes everything does not go as what imaginable. There are so many things that must be learned and understood in Forex investment. **What is the Most Important**

**Thing in Forex Trading?** The most important thing to do is to apply the method trading a consistent and comfortable rather than a perfect system that can occasionally make a profit of one hundred percent but it is not convenient to use. Hard work will eventually bring good luck by itself. **Successful traders in Forex Market**

Successful traders can always make decisions wisely, do not panic, or to rely on luck. Trader must have a strategy according to which the most dependable, a strategy that is able to identify the market conditions so that the strategy can work well. Many traders who have a variety of strategies, but usually only one who used to be able to reach its target or achieve a profit. The key to success in Forex trading is to have a system that fit and become familiar with the system. **Here are some ways or strategies to achieve a profit in**

**the Forex market 1. Creating A Forex Trading Plan ([Learn How to Make a Trading Plan](#))** The first thing done by the trader is to

create a trading plan. Make a trading plan that is clear, concise and effective help traders in executing Forex market. Clearly define the conditions of entry and exit, big risk per trade, risk / reward ratio and strategies to maximize profit. Trading only in accordance with the plans that you have created. Although you use a method of trading

that you think is accurate and has been tested, you do not can ensure one hundred percent of your method will always work well in any market condition with no clear trading plan. With trading plan created traders have been directed towards the goal in achieving its goals, namely profit. **2.How to choose the best Forex indicator? (A Simple Trading Strategy for Forex Traders!)** Using these [simple indicators](#) and simple as an aide in determining profit. Simple system can give the profits accumulated in real conditions as long as you are disciplined and understand the rules that exist. Indicators that is easy to read and comfortable when you use will increase confidence and level improve your emotional stability. So when you do the analysis and decision-making in the deal, you already feel at ease and be able to know price movements with your analysis. **3.You must be aggressive and defensive in Forex trading (How to Maintain Discipline in Your Forex Trading)** Aggressive on the Forex market. In trading, you must be aggressive and defensive at the same time. If you are not aggressive it will be difficult to generate profit, but if not defensive you will be difficult to maintain profit you've earned previously. It takes practice for the sake of exercise in order to balance between aggressive in grabbing defensive maintain profit with profit. Always decided to discipline the market entry based solely on trading signal generated by trading systems that have been determined. Trading system includes trading methods, strategies and [money management](#), so you should know what exactly you are looking from market price movements. Make a deal in the trading

plan that you will only enter the market if the market has been in accordance with your strategy. **4.How to Use a Trailing Stop in Forex trading? (The Trailing Stop Strategy)** Using a Trailing Stop. The core of this problem is that your profit can not be estimated with absolutely sure in the market. The only thing you can control is risk. That is why you should always first determine the target and diligently manage risk using trailing stop. Maybe it does not look very spectacular, but believe me the use of a trailing stop is much easier than using a ratio of 1: 2. With the use of trailing stop,you will be easier to anticipate price movements that suddenly changed direction sharply. When you open a buy on the market that is being uptrend, you can positioning a trailing stop to move up every last increase in price by 10 pips. Thus, when prices turned down sharply, the position is not will close with a total loss. **How to Make Money Trading Forex? (How To Profit From the Forex!)** Profit is not something that you can learn by reading alone. You need some experience and high-flying hours. You'll be surprised where you will often repeat the same mistakes, which led to profit into loss. From here you can learn to control themselves. Until eventually you will get to a point knowledge of where the market will move. And this is the time to reach the target profit which makes you more to fly alongside the dollar purse. **By Finandya Nigelia**
