

Tickmill, the global provider of FX and CFD brokerage services, announced the addition of **Bitcoin** to its ever-growing suite of trading products. Following the recent introduction of Bond trading, Tickmill is now offering its Clients the opportunity to **trade Bitcoin**, one of the world's best-performing currencies on its **advanced trading platform**. Bitcoin trading offers traders the ability to tap into a fast-growing global market. Unlike traditional currencies, Bitcoin is a digital currency that is completely decentralised, meaning no central bank or organisation controls it. Traders from all over the world regard Bitcoin trading as an attractive area of investment with high yield potential due the currency's high levels of volatility. Recently, **Bitcoin's price** has climbed to record highs, **exceeding nearly three times the price of gold**. Tickmill's Group CEO, Mr. Duncan Anderson, commented, *"Bitcoin has long been recognised as a robust trading instrument which is highly regarded among investors on a global level. Driven by our ongoing efforts to provide products and services that are responsive to the ever-changing customer needs and market trends, we launched Bitcoin trading to allow our Clients to make the most of this popular instrument, while taking advantage of our deep market liquidity and reliable execution. Our aim is and will always be to add extra value to our Clients' investments with some of the industry's latest and most sophisticated solutions. With this in mind, we are planning to introduce more cryptocurrencies in the near future to empower traders to build a well-diversified investment portfolio."* Tickmill Clients can **trade**

BTC/USD with **competitive spreads** and **0 commissions**. For more information about Bitcoin trading, [click here](#) . **About Tickmill**

Tickmill is a Forex and CFD trading services provider, authorised and regulated in the United Kingdom by the Financial Conduct Authority and in the Seychelles by the Financial Services Authority. Catering to the needs of both individual and institutional investors, Tickmill offers first-class trading products with some of the lowest spreads and commissions in the industry, as well as ultra-fast execution speed.

- Please visit <http://www.tickmill.com> or contact marketing@tickmill.com.
- Trading CFDs can involve losses that exceed the initial investment.
