#### Trading Analysis of USD/CHF

Last weekend the head of the Swiss Central Bank said in an interview for the national publication Neue Zuercher Zeitung: The large size of the balance sheet is not a problem in itself;

It could even be increased further if necessary;

The Swiss franc remains highly overvalued;

Inflation is only slightly above zero;

Production capacity in Switzerland is not fully utilized;

It would be "completely premature" to make adjustments to the current easing policy of the central bank (start to reduce the size of the balance sheet and tighten monetary policy);

It would be wrong to send the message to the world that the SNB would be the first central bank in the world to think about policy tightening.
