

# **Shib Is One of the Most Viewed Assets in the World, According to Coinmarketcap**

The interest for SHIB is reflected in the number of views of the Shiba Inu page directly on CoinMarketCap. Thus, in North America, South America, Asia, and Africa, SHIB is the third-most-viewed cryptocurrency after Bitcoin and Ethereum. In Oceania and Europe, Shiba Inu also gives way to Terra Classic, probably thanks to the pump of LUNC in the last weeks of August. The two regions with the highest interest are Latin America and Africa. Furthermore, based on the CoinMarketCap data, we can see that Shiba Inu remains one of the most viewed coins independently of crypto market conditions in July and August. It is not difficult to understand the reasons behind the perennial interest of crypto enthusiasts in SHIB. Shiba Inu is working on and reports on a number of projects that Shiba army members believe should bring the ecosystem to an entirely new level and eclipse its main competitor, Dogecoin.
