

[text] **NZD/CAD** during the recent day was in a strong and consistent uptrend that buyers were successful in achieving the highest price of **0.94249** .Right now price has been stopped by reaching to the round level of **0.94444**(Resistance Level) and **R1** weekly pivot point and by making a top price had a little descend. As it is obvious in the picture below, between the top price of **0.94908** and the bottom price of **0.86146**, there is a Bat harmonic pattern that with completion of the D point there will be a warning for decreasing of the price.RSI indicator is in saturation buy area in daily time frame that warns the potential of formation of a top price and a little price reformation in this range.One of the important warnings for decreasing of is breaking of supportive level of **0.92211** . **Written by the technical team of PipSafe Company NZD/CAD Chart**
