

[text] **EUR/USD Technical Analysis 29 April ,2015** Source: [ACFX Forex Broker \(acfx Review\)](#) Tuesday EURUSD continued to rally and has now traded up to a major down channel top. The question is can EURUSD breach this and the 1.1000 level or will sellers come into the market and push the price action lower. This morning I am monitoring the price action for a test of the channel top. Alternatively a failure to sustain a move above this level could see EURUSD trade back down to the 1.0900 support level. From a technical perspective EURUSD is trading in an intraday 1 hour up trend with the line of control at the 1.0850 level. **EUR/USD Chart**
