

[text] **Forex Market News** Source: [FxPrimus](#) Non Farm Payroll (NFP) is shortly approaching. Please be advised that the US Non-Farm Payrolls are being released Friday, May 8, 2015 at 8:30 AM New York Time (15:30 on your MT4 Platform). Keep in mind that, historically, this is the most "market-moving" economic data released each month. As a result, there may be periods of extreme volatility shortly before and after the release. This volatility may bring periods of illiquidity in the market which may make it difficult to enter and exit the market at desired prices.. Please utilize risk management and keep NFP in mind when making your trading decisions. [/text]
