

[text] **Forex Brokers News** [Fxpro Review](#) As of Monday June 1st 2015 all of our FX pairs will be quoted to five decimal places. This excludes major pairs, which are already quoted to this fifth precision point (Japanese yen is quoted to 3 decimal places rather than the standard 2). Please see the table below for more details. This allows you to trade with a greater degree of accuracy on all FxPro currency pairs and helps you to avoid losing pips when the fourth decimal place is rounded up or down. **Latest Forex Brokers News by PipSafe.com**
