The bias is bullish in nearest term testing 1.1050 and the trend line resistance area as you can see on my hourly chart below. Immediate support is seen around 1.0950. A clear break below that area could lead price to neutral zone in nearest term testing 1.0900 region. Potential daily range today is seen between 1.0950 - 1.1050. - See more at: <https://www.fxopen.com/en/forex-market-analysis?&id=ecd4719f-7416-4e44-8939-0d66cb617c0f#sthash.Zr1YKv8E.dpuf> **EUR/USD Chart**
