

Forex Brokers News XM Launches New MT4 WebTrader

Source: [XM Broker \(Review and Forex Rebates up to 85%\)](#) XM proudly announces the launch of the brand new WebTrader platform. The complete trading functionality of the renewed [XM](#) WebTrader platform is based on its compatibility with MetaTrader4. Perfectly suitable for both demo and real trading account holders, the MT4-based WebTrader is currently accessible in English, Chinese, German, Japanese, Portuguese, Russian and Spanish, with further languages to follow in the upcoming weeks. The XM WebTrader is faster and better in every respect as it incorporates a series of functionalities designed to make it user-friendly as well as efficient for round-the-clock access to the global financial markets. Moreover, XM clients can directly access WebTrader and use it straightaway on PC and Mac OS, without any additional downloads. www.xm.com
