FXOpen offers Meta Trader 4 Web Trader

FXOpen Forex Broker (Review and Forex Cashback up to 85%)

FXOpen is pleased to announce the launch of **Web Trader** – an online version of the popular Meta Trader 4 platform. Now you can access the trading terminal through your preferred web-browser and trade wherever you are.

With Web Trader there is no need to download and install Meta Trader 4 or other additional trading software on your computer. All you need is a stable Internet connection. Web Trader supports all popular web-browsers and you can use any operating system of your choice including Mac OS and Linux. It takes just a few clicks to log in to your trading account and start trading.

If you've been using the desktop version of the MT4, **Web Trader** will feel very familiar. It retains the same interface and the full set of features such as:

- [trade history;](#)
- [graphic tools and visual charts;](#)
- [access to all your MT4 trading accounts;](#)
- [9 time-frames;](#)
- [all order types.](#)

First time users will also find it easy to grasp the basic features of the Meta Trader Web Trader due to its intuitive interface.
