Forex Market Update This morning, the greenback is trading higher against most of the major currencies, ahead of the US initial jobless claims and the Philadelphia Fed manufacturing survey data, scheduled to be released in a few hours. The EUR is trading lower against the USD, after the German IFO business climate index surprisingly recorded a modest fall in December. The GBP is trading lower against the USD, as investors shrugged off UK's stronger than expected retail sales data. The upbeat data points towards considerable amount of recovery in the UK economy in the final quarter. Yesterday, the greenback traded higher in the New York session against the key currencies, after the US Federal Reserve in a highly anticipated move hiked benchmark interest rate for the first time in almost a decade. The Fed raised the key interest rate by 25 basis points to 0.5%, as widely expected. Going further, the Fed foresees a slow and gradual rate hikes in 2016. On the macroeconomic front, the US preliminary Markit manufacturing PMI declined more-than-anticipated to a three-year low level in December and the nation's industrial production witnessed its steepest decline in more than three and a half years in November, suggesting moderate fourth-quarter growth. On the other hand, housing starts in the US surged to a five-month high on a monthly basis in November, indicating strength in the nation's housing market. **EURUSD** This morning at 10:40 GMT, the EUR is trading at 1.0849 against the USD, 0.59% lower from the New York close, after Germany's IFO

business climate index unexpectedly declined in December. This morning, the pair traded at a high of 1.0917 and a low of 1.0832. The Euro traded marginally lower against the US Dollar in the New York session yesterday, with the pair closing the session at 1.0913. The pair is expected to find support at 1.0783 and its first resistance at 1.0963. **GBPUSD** At 10:40 GMT, the pair is trading at 1.4937, with the Pound trading 0.41% lower against US Dollar from the New York close. In economic news, UK's retail sales rose more-than-anticipated on a monthly basis in November. The pair witnessed a high of 1.5011 and a low of 1.4920 during the session.
