

We are waiting for Gold revers signal(2016.02.09) Please look at bellow chart:

Gold price goes up rapidly during last 3 weeks it seems that now we should wait for good revers signal The MACD will not who us any revers signal buy on Stock we can see good sign for revers signal opportunity. The other sign is Bump and Run pattern it seems that we will see bump and run pattern in the next 12 hours.

Recommendation: You can wait till bump and run pattern create or wait for good revers buy signal on about 1150. M.Jamshidi
