

Daily Currency Report - This morning, the greenback is trading lower against most of the major currencies, ahead of the US annualized gross domestic product and initial jobless claims data scheduled in a few hours. The EUR is trading higher against the USD, after the Euro-zone's economic and services sentiment indices improved higher than expectations, indicating that businesses and consumers are more upbeat about the economic conditions in April. The YEN gained ground against the USD, after the Bank of Japan surprised markets by keeping interest rate unchanged at -0.1% and pledged to increase base money at an annual pace of ¥80.00tn. The central bank stated that it stays committed to achieving its 2.0% inflation target in about two years and announced a loan support program worth ¥300.00bn for banks in areas hit by the recent earthquake. Moreover, the nation's unemployment rate fell unexpectedly in March and the National CPI dropped surprisingly on a yearly basis in the same month. Yesterday, the greenback traded mixed in the New York session against the key currencies, after the Fed maintained the benchmark interest rate at 0.5% and provided no strong signals of the central bank raising rates in the June meeting. However, it remained open to raising interest rates in the near future. Moreover, the FOMC noted an improvement in the labor market, but agreed upon slowing economic growth in the nation, while also indicated that it would monitor global economic and financial developments. Meanwhile, advance goods trade deficit recorded a sharp drop in March.
